Health and Baby Care PRODUCTS

 Italian **engineering**

www.bremed.com

company MISSION

We are living in a challenging era where the speed of market developments, together with discovery of new materials and techniques have significantly modified the basic scenarios of the industrial processing over the last few years. In such contest, our company must take into account ethical and cultural consideration: health is the most important asset in life!

Feeling obliged with this philosophy, our mission is to manufacture not only products, but systems and services for a better life. Today Bremed Group is actively cooperating with Universities, Institutes, Clinics and Hospitals in order to gain a better idea of how the products are used and therefore to extend such experience and to translate it into new products or new applications with harmonic solution between design and function.

BREMED

OVER 25 YEARS OF HOME HEALTH CARE

Since 1991, year of incorporation in Italy of Bredmed Group, we provide our customers worldwide with health and well-being devices. Founded by Mr. Elio Cicigoi the company was born with the purpose to enter in the growing health care market, a concept which was rapidly taking off also in the Italian scenario. Supported by a very solid mechanical engineering background and combining for the first time in Italy a medical device product with ergonomic and functional design concept, Bredmed was the very first innovator that changed the style and look of the products, followed later on from many others. It is during these years that Bredmed started the cooperation with one of the most famous Italian industrial designer Mr. Pino Spagnolo that created for Bredmed a new nebulizers line, introducing for the first time the concept of ergonomic design, combining materials and colorful products in one

industry which, at that times, was shaped by too squared lines and medical white colors.

Nebulizers in particular were looking like “shoe boxes” and Bredmed has been the real first innovator to bring a totally new industrial design concept in projecting and developing something completely different in the international offer of this kind of products.

The success of the new line of nebulizers made of curved lines, ergonomic and functional design, transparent and colorful plastic materials was almost immediate! And Bredmed gained soon a remarkable recognition in Italy as well as in several foreign Countries, including USA where the company started to massively exporting.

Over the years, Bredmed has maintained his commitment to innovation and quality over which the Group has founded its reputation and success.

company PROFILE

It's already over two decades that Bremed is a success story of a family owned business which originated in Italy.

And since 1991, Bremed's commitment has been to place on the market innovative and high quality products in order to satisfy the needs of the customers worldwide. As a leading Italian company we have constantly improved our skill and competence in developing, innovating and controlling two main technologies:

- Motors and pumps
- Digital sensors

Through which we manufacture a wide range of health care products, for several different applications.

Love for life

Diagnostic products:

- Digital and Infra-red thermometers
- Blood Pressure Monitors
- Praxis
- Glucose Monitoring System

Therapy products:

- Complete systems for aerosol therapy
- Light therapy devices
- Chromo therapy devices

Wellness & personal care products:

- Massagers
- Heating Pads & Heating Blankets
- Personal scales
- Orthopedics Pillows & Back Support
- Ultrasonic Humidifier
- Beauty

Baby Products

- 

- 

Our philosophy is to provide the best quality in both products and services all over the world. That's why Bremed stands not only for highest product standards and innovation, but also for reliability in our international trade relations.

Many of our products are currently sold by the most valuable brands in the market and successfully exported in more than 50 Countries worldwide.

The Bremed R&D laboratories implement a strict control of materials and components to ensure high quality on each final product.

The result of our lines is a brilliant combination of:

- Italian design
- Italian engineering
- Italian quality

our sales CHANNELS

Love for life

With more than **200 high-end products** in stock, Bremed represents one of the most complete assortment in the home health care market. We export our medical devices and well-being accessories in more than **50 countries worldwide.**

Bremed, with over 25 years of experience in the **Home Health Care** is the ideal partner for:

- Pharmacy
- Medical Shops
- Selected retailers
- Large retailers
- Specialized Baby Shops
- Elderly Homes
- Doctor practice cabinets

DESIGN & Development

Innovation and design have always been the strategies of choice for Bremed.

Over two decades of perseverance on R&D, we have developed numerous ergonomic design and innovative features, all to be unveiled in different generations of our home health care products.

These years, Bremed started to cooperate with Mr. Pino Spagnolo, one of the most famous Italian industrial designer. This innovative design idea can be shown by the revolutionary nebulizer design concept to a curve lines and colourful product, which is completely different from the traditional 'shoe boxes' and white colour one.

Bremed will continue to follow the philosophy to keep studying and developing innovative technical solution to provide the most accurate and user friendly products to our clients. In such perspective several of Bremed models are regularly presented to international design contest like RedDot® and Plus X®

Innovation is our commitment and our best offer to our clients worldwide. Design is an Italian tradition that we are proud to carry on.

PINO SPAGNOLO
DESIGN

Bremed understands that no product or innovation is considered valuable without quality. Therefore, we stand by our deep commitment toward high standards in manufacturing quality.

Our Quality Management System (QMS) has been accredited with DIN EN ISO 9001:2008, EN ISO 13485:2012 + AC:2012 approval, and complies with 93/42/EEC of the Medical Device Directive.

At Bremed, we value our customers and therefore we have developed various systems to heighten customers' satisfaction to the greatest possible.

Our International Warranty Program provides a 24 months full warranty, absorbing labor and parts charges for manufacturing defects. We have also developed a Vigilance System to effect return and recall processes of non-conforming products.

Furthermore, Bremed also has in place a Customer Complaint Management System, within which customer complaints are duly noted and carefully investigated.

Warranty Terms:
The equipment delivered by Bremed is guaranteed for 24 months from the date of the shipment.

Please read carefully the warranty terms inside the instruction manual, or refer to the warranty terms on our website www.bremed.com. You can also contact the local authorized distributors and dealers for details.

DIGITAL THERMOMETERS

A common and simple device like a thermometer can precisely perform the function in monitoring our body temperature. The right temperature measurement is a precious information to be warned about fever level as well as to indicate the recovery status during sickness.

Since many years Breded is actively studying and developing innovative technical solutions to provide a wide range of reliable and user-friendly thermometers.

Our assortments for the thermometer line include:

- Digital thermometer – both rigid and flexible tips;
- Infrared Ear Thermometer
- Infrared Forehead Thermometer
- No Contact Thermometer

BD 1500 bluebeam™ No Contact Thermometer

■ THERMOMETER NO CONTACT

- Instant measurement
- Last 8 measurements memory

■ INFRARED SCAN THERMOMETER

- LCD Backlight
- Beeper

■ ROOM TEMPERATURE FUNCTION

- Fever alarm
- Low-battery indication

■ bluebeam technology Target light indicator

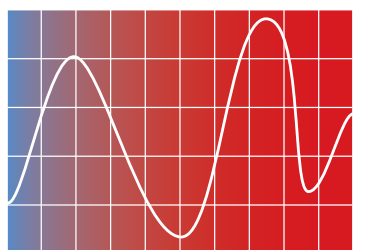

The blue beam technology allows the user to target precisely the area where to take the measurement

Simple & Reliable

On display stand the unit will automatically register the room temperature

Continuous scanning mode

the smile 😊 will automatically indicate the correct distance for an accurate reading (3-5cm)

INFRARED Thermometers

*Temperature
Scanning*

BD II60A IR Ear Thermometer

- Instant measurement
- °C/°F measurements units
- Last 8 measurements memory
- Low power consumption and automatic power off
- Soft touch material for easy grip
- With scan function (0-100°C)
- No tips cover necessary

BD II80A IR Forehead Thermometer

- Touch & Read Function
- Instant measurement
- °C/°F measurements units
- Last 8 measurements memory
- Lower power consumption and automatic power off
- Soft touch material for easy grip

FLEXIBLE Tips

BD 1130 Digital Thermometer

- Flexible tip
- Waterproof
- Standard 60 seconds reading
- Beeper
- Fever alarm
- Memory of the last measurement
- Transparent storage case

Flexible Tip

RIGID Tips

BD 1200 Digital Thermometer

- Rigid tip
- Waterproof
- 30 seconds reading
- Beeper
- Fever alarm
- Memory of the last measurement
- °C/°F measurements units
- Extra large display with lens effect
- Transparent storage case

*Magnifying Lens -
Easy Reading*

BD1250 Digital Thermometer

- Rigid tip
- Waterproof
- 60 seconds reading
- Beeper
- Fever alarm
- Memory of the last measurement
- Transparent storage case

BD8000 Full Automatic Arm Type Blood Pressure Monitor

with WHO hypertension indication
and irregular heartbeat detection

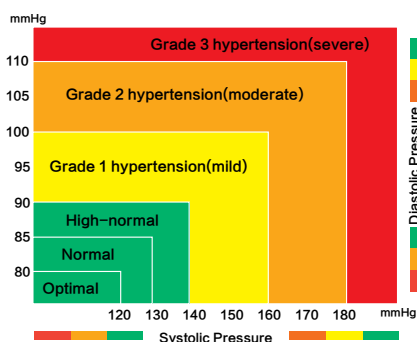

- I.M.S. Inflating Measurement Software
- Super large LCD colored display, size: 12 x 12 cm
- 2-person use / 60 readings each
- WHO hypertension classification indicator
- Irregular heartbeat indicator
- Automatic power off system
- Low battery indicator
- Time and date display
- Average for last 3 times measurement
- Rated input: Battery: 5.0V 1.0A (Micro USB)
- Internal battery: 3.7Vd.c. 1800mAh

Aluminum Body

WHO Hypertension Classification Indicator

BD8600

Full Automatic Wrist Type Blood Pressure Monitor

- I.M.S. Inflating Measurement Software
- 2 x 60 Memories
- WHO hypertension classification indicator
- Irregular heartbeat indicator
- Automatic power off system
- Low battery indicator
- Time and date display
- Average for last 3 times measurement
- Extra large LCD display – 3 values in one reading (SYS + DIA + PULSE)
- 2AAA 1.5V alkaline batteries included

BD8700

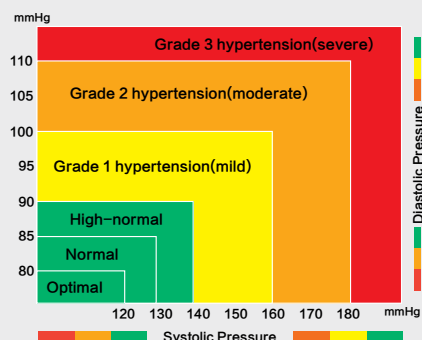

Full Automatic Arm Type Blood Pressure Monitor

- I.M.S. Inflating Measurement Software
- 2 x 60 Memories
- WHO hypertension classification indicator
- Irregular heartbeat indicator
- Automatic power off system
- Low battery indicator
- Time and date display
- Average for last 3 times measurement
- Extra large LCD display – 3 values in one reading (SYS + DIA + PULSE)
- 4AA 1.5 alkaline batteries included
- AC adaptor (Optional)

WHO Hypertension Classification Indicator

BD550

Full Automatic Arm Type Blood Pressure Monitor

- Fuzzy Logic
- One touch operation
- 2 x 60 memories
- 4 – WHO hypertension classification indicator
- Irregular heartbeat indicator
- Automatic power off system
- Low battery indicator
- Time and date display
- 1 – average mode
- Extra large LCD display–3 values in one reading (SYS + DIA + PULSE)
- 4AA 1.5V alkaline batteries not included

BD555

Full Automatic Wrist Type Blood Pressure Monitor

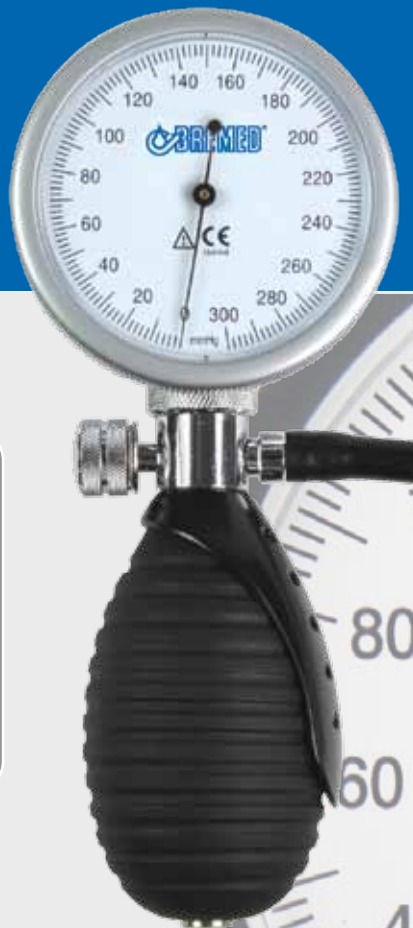

- Fuzzy Logic
- One touch operation
- 1 x 60 memories
- 4 – WHO hypertension classification indicator
- Irregular heartbeat indicator
- Automatic power off system
- Low battery indicator
- Time and date display
- 2AAA 1.5V alkaline batteries not included

BLOOD GLUCOSE MONITORING SYSTEM

Diabetes is a concrete and serious pathology of the days we are living.

The possibility to control daily in an efficient way the glucose level in the blood is an essential practice in monitoring our health status.

Bremed has developed a state of art device which allows accurate and safe detection of the value of the glucose in the blood

Code Free!

BD9000

Auto-coding Blood Glucose Monitor

Measuring unit -
mg/dL & mmol/L

Minimal Blood
Required

Test Time

Auto
Coding

450 Memories
Time & Date

Average
7/14/21/28 Days

Specification:

- Measurement range: 20-600 mg/dL (1.1-33.3 mmol/L)
- Min. required blood volume: $\geq 0.3\mu\text{L}$ (micro liter)
- Automatic coding
- Stores up to 450 results with time and date
- Calculation of 7, 14, 21 and 28-day averages
- Storage temperature: 10 ~ 40°C (50 ~ 104°F)
- Storage humidity: 10% - 90%

BD9000 KIT'S CONTENTS

- Blood Glucose Meter
- 10 Glucose test strips
- 1 lancing Device
- 10 lancets
- Carry Case
- Instruction Manual
- CR 2032 3V lithium coin battery x 1

For complete procedure, refer to instruction manual.

suitable for self-testing

BD9050 Test Strips

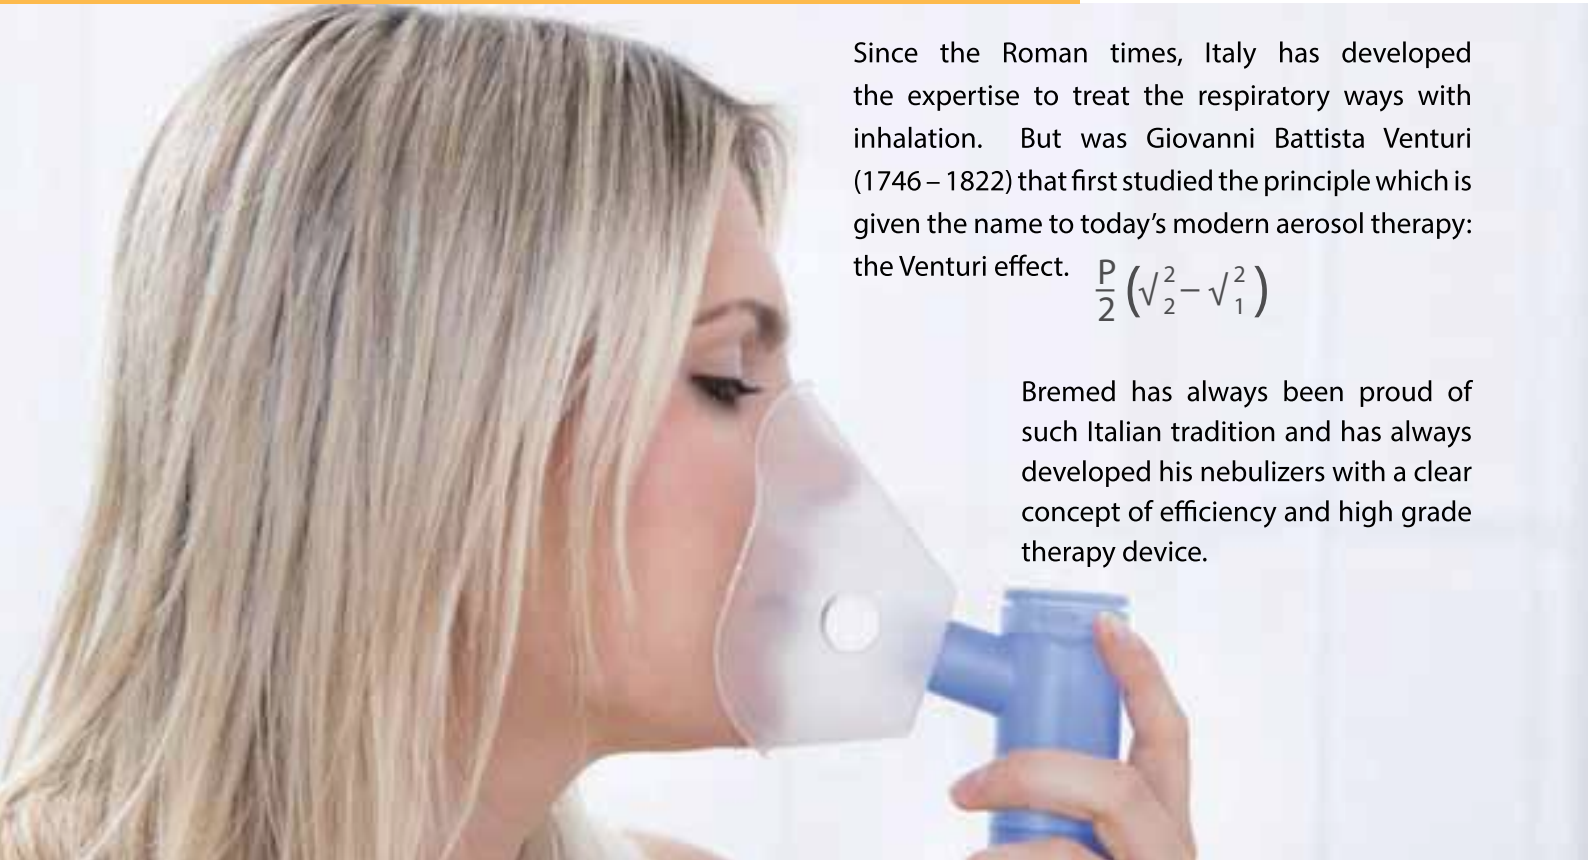

- 50 BREMED Test Strips
- 2 Vials of 25 strips each
- User Manual

Specification:

- Test Sample: capillary whole blood
- Assay Range: 20 ~ 600 mg/dl (1.1 ~ 33.3 mmol/L)
- Sample Volume: Minimum 0.3µl
- Operating temperature: 10 ~ 40°C (50 ~ 104°F)
- Relative Humidity: 10 ~ 90%
- Hematocrit: 30 ~ 60%

NEBULIZERS AND SYSTEMS FOR AEROSOL THERAPY

Since the Roman times, Italy has developed the expertise to treat the respiratory ways with inhalation. But was Giovanni Battista Venturi (1746 – 1822) that first studied the principle which is given the name to today's modern aerosol therapy: the Venturi effect.

$$\frac{P}{2} (\sqrt{v_2^2} - \sqrt{v_1^2})$$

Bremed has always been proud of such Italian tradition and has always developed his nebulizers with a clear concept of efficiency and high grade therapy device.

VOCABULARY

The values that allow a rapid evaluation of an aerosol therapy system composed of a pneumatic compressor and an atomizer or by an electronic ultrasound nebulizer are:

MMAD (Mass Median Aerodynamic Diameter): This is the mean aerodynamic mass of the particles.

Breathable fraction:

This is the quality, expressed in percentage, of the particles < 5(μm). This dimension makes it possible to reach the laryngotracheal and alveolar tracts.

Output rate:

This is the maximum output rate of which the nebulizer is capable. The higher the rate, the lesser time required for the patient's treatment session.

Residual volume:

This is the quantity of medication that the nebulizer is unable to nebulise.

What is a Nebulizer?

Nebulizer is a device used to deliver medication in forms of liquid mist to the airways. It is commonly used in treating several respiratory diseases.

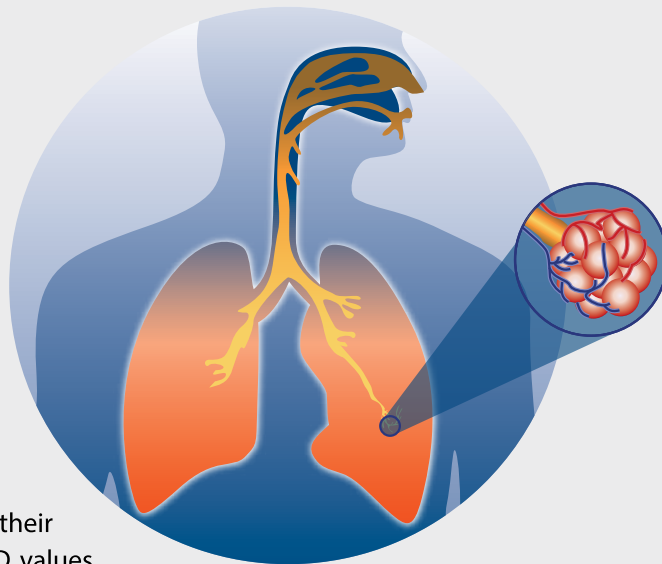

Treatment of lower respiratory tract

Aerosol is a suspension of solid particles and/or drop of liquid that penetrate into the airways through the mouth and nose, coming into contact with larynx, pharynx and trachea, and so reaching the lungs, where they reach bronchial mucosa and Alveoli.

However, in order to make a treatment work efficiently, the unit must necessarily be in the conditions to supply the drug in a selective way inside the lower respiratory tract.

The correct drug particle deposit inside air cells is related to their dimension (particle-size analysis is defined through MMAD values and breathable fraction), which is determined by the nebulizer quality.

How and where particles will settle depend on their size, which is determined by the atomizer quality.

TECHNOLOGY

Piston Compressor Nebulizer Technology:

A piston compressor unit produces compressed air that passes through the air hose into the atomizer where, because of the Venturi effect, it gets mixed with the medicine and generates the aerosol.

Ultrasonic Technology:

Ultrasonic nebulizers are devices which utilize a source of ultrasound, such as a piezoelectric crystal oscillator, acoustically coupled to a liquid in a nebulizing chamber in order to generate an aerosol of small liquid droplets. Faster and silent.

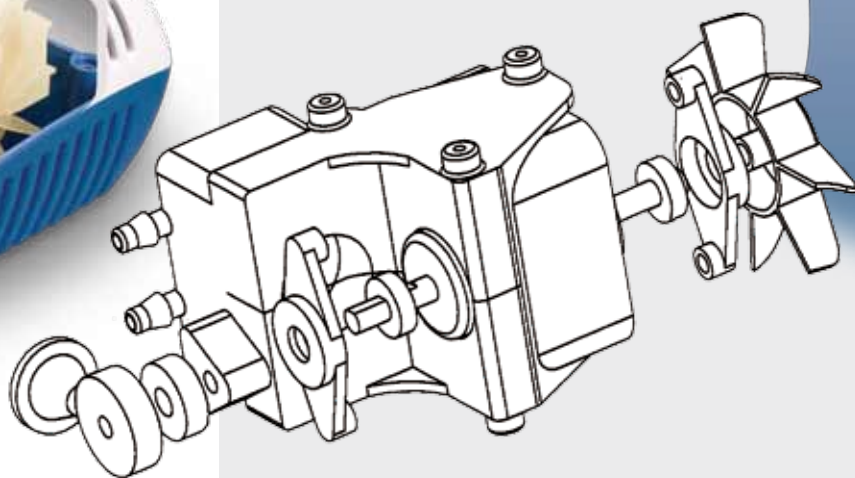

MESH Technology:

Recent improvements in nebulizer technologies have led to the development of mesh nebulizers. They force liquid medications through multiple pores in a mesh in order to generate aerosol. As small and portable nebulizers that are powered by either battery or electricity, they have silent operation, short treatment times, increased output efficiency, and minimal residual volume.

Advantages of mesh nebulizers include consistent and improved aerosol generation efficiency, a predominantly fine-particle fraction reaching into the peripheral lung, low residual volume, and the ability to nebulize in low drug volumes.

Bremed is offering a full range of aerosol therapy units suitable for preventing and treating respiratory diseases, with the guarantee of the highest therapy efficiency till the lower respiratory tract.

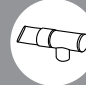

ITALIAN ENGINEERING

All our piston compressor nebulizers are developed by the most advanced materials and the axis is rotating on three different ball bearing assuring long lasting performances and ultimate quality standard.

ATOMIZER BRE-NEB™

BD5011

BOOST ATOMIZER Bre-Neb™

BREMED ITALIAN ENGINEERING and BREMED R&D are proud to introduce the FIRST BUILT IN BOOST CONTROL :

BOOST ATOMIZER BRE- NEB

The only atomizer with SPEED CONTROL

The built in boost control generates different internal turbulence that will allow only the smaller particles to be inhaled. Thanks to the reduction of wasted medication, BRE-NEB is also recommended for severe respiratory disorders such as COPD or Asthma, when expensive medications are prescribed or for intensive use in general.

Advanced Feature:

OPEN Valve=> Nebulization is faster

CLOSE Valve => Nebulization is slower and the MMAD is generally smaller

The only atomizer with speed selector

Easy to use system

Can be filled directly from above

10ml capacity - ideal for every treatment type

With a graduated scale for easy medication dosing

- Bre neb booster effect with correct nebulisation
- More effective in half the time

BD5000

Micro Piston Compressor Nebulizer

- Compressor: Micro pump piston
- Power supply: USB power supply or 4 x AA batteries
- Power consumption: 4.0W
- Max pressure: 1.27 bar 18.38 psi 126.7 kPa
- Operating pressure: 0.73bar 10.63 psi 73.3 kPa
- Max. air flow: 10 L/min
- Operating air flow: 0.2~10 L/min
- Mass Median Aerodynamic Diameter (MMAD) according to EN-13544-1: approx. 3.9 μm
- Noise level: below 58dB at 1M distance

Accessories set included:

- Adult mask x 1
- Pediatric mask x 1
- Angled mouthpiece x 1
- Atomizer x 1
- Tube 1.5m long
- 5 Filters set x 1
- USB cable

BD5001 Piston Compressor Nebulizer

- Compressor: Oilless and maintenance-free piston pump
- Power Feeding: 230V-50Hz – other configurations on request
- Power consumption: 55W
- Max pressure: 2.2 bar / 32.0 psi / 220 kPa
- Operating Pressure: 1 bar / 14.5 psi / 100 kPa
- Max Air Flow: 9.0 l/min
- Operating Air Flow: 7.0 l/min
- Mass Median Aerodynamic Diameter (MMAD) according to EN-13544-1: 2.44 μ m
- Noise Level (EN 13544-1 Standard) Approx. 58 dBA

Accessories set included:

- Adult mask x 1
- Pediatric mask x 1
- Mouthpiece x 1
- Atomizer x 1
- Flexible tube 1.5m long x 1
- 5 filters set x 1

BD5007 Compact Compressor Nebulizer

- Compressor: Oilless and maintenance-free piston pump
- Power Supply: 230V-50Hz – other configurations on request
- Power consumption: 20W
- Max pressure: 2.0 bar 29.0 psi 200 kPa
- Operating Pressure: 1.0 bar 14.5 psi 100 kPa
- Max Air Flow: 8.0 l/min
- Operating Air Flow: 6.5 l/min
- Mass Median Aerodynamic Diameter (MMAD) according to EN-13544-1: 2.44 μ m
- Noise Level (EN 13544-1 Standard) Approx. 48 dBA

Accessories set included:

- Adult mask x 1
- Pediatric mask x 1
- Angled mouthpiece x 1
- Atomizer x 1
- Tube 1.5m long
- 2 filters set x 1
- Nylon pouch x 1

Nylon Pouch Included

BD5002 Piston Compressor Nebulizer

- Compressor: Oilless and maintenance-free piston pump
- Power Supply: 230V-50Hz – other configurations on request
- Power consumption: 63W
- Max pressure: 3.0 bar 43.5 psi 300 kPa
- Operating Pressure: 1.5 bar 21.8 psi 150 kPa
- Max Air Flow: 10.0 l/min
- Operating Air Flow: 7.0 l/min
- Mass Median Aerodynamic Diameter (MMAD) according to EN-13544-1: 2.44 μm
- Noise Level (EN 13544-1 Standard) Approx. 55 dBA

Accessories set included:

- Adult mask x 1
- Pediatric mask x 1
- Angled mouthpiece x 1
- Atomizer x 1
- Tube 1.5m long
- 5 Filters set x 1

BD5005 Heavy Duty Piston Compressor Nebulizer

- Compressor: Oilless and maintenance-free piston pump
- Power Feeding: 230V-50Hz – other configurations on request
- Power consumption: 70W
- Max pressure: 3.0 bar / 43.5 psi / 300 kPa
- Operating Pressure: 1.0 bar / 14.5 psi / 100 kPa
- Max Air Flow: 8-10 l/min
- Operating Air Flow: 7.0 l/min
- Nebulization Rate: 0.20 ml/min
- Mass Median Aerodynamic Diameter (MMAD) according to EN-13544-1: 2.44 μm
- Noise Level (EN 13544-1 Standard) Approx. 50 dBA

Accessories set included:

- Adult mask x 1
- Pediatric mask x 1
- Angled mouthpiece x 1
- Atomizer x 1
- Tube 1.5m long
- 5 Filters set x 1

For continuous use

BD5200

Mesh Nebulizer

- Bomed BD 5200 is a compact and lightweight portable nebulizer which utilizes vibrating mesh technology to deliver treatments in less than 10 minutes for most medications
- Mesh nebulizers are more efficient than jet nebulizers and can provide higher drug doses to patients
- Silent operation, short treatment times, increased output efficiency, and minimal residual volume
- Auto-off function
- Auto-clean function > increases the mesh life of 25%
- Ergonomic design
- Max Nebulizing Rate: 0.2ml/min
- Max/Min Air Flow: 8ml/0.5ml
- Particle Size (MMAD): about 5 μ m
- Lower Battery Indication: 2.1V \pm 0.2V
- Power Supply: 2 AA batteries (not included) or AC Adaptor (AC-DC 3V 1A)

Accessories included

- High grade silicone Mask
- High grade silicone Mouthpiece
- AC Adapter
- Nylon carry bag

NASAL IRRIGATOR AND ASPIRATOR

The First And Most Complete Device For Nasal Care

WHAT IS A NASAL IRRIGATION?

The Nasal Irrigation is a practice that consists in the passage of hydro-mineral solutions inside the nasal cavities for therapeutic or hygienic purpose

WHY IT IS SO IMPORTANT ?

Your nose is the most efficient barrier against micro organism and polluted articles

A good nasal irrigation and aspiration clean nasal cavities from mucus, polluters and inhaled allergens

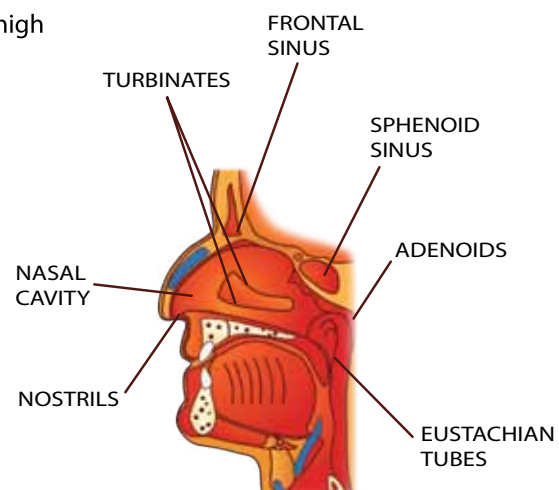

This simple daily gesture can prevent and treat :

- *Rhinitis*
- *Sinusitis*
- *Otitis*
- *Adenoidism*
- *Seasonal allergies*

Clinical studies have enlightened that a continuous nasal hygiene help keeping the inhaled air clean and as you know , the air is our main source of vital energy!

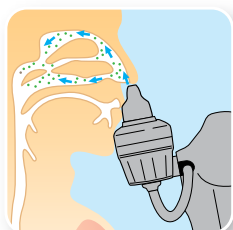

HOW DOES BD5600 NASAL IRRIGATOR AND ASPIRATOR WORK ?

Bremed BD5600 is a nose specific nasal irrigator and aspirator able to produce a jet vaporization whose particle size make the device suitable for the specific treatment of nose cavity and high respiratory way

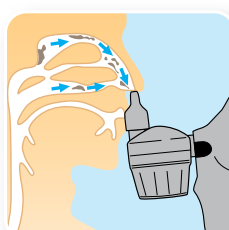

BD5600 NASAL IRRIGATOR AND ASPIRATOR Rechargeable battery

- Indicated in the specific treatment of nose cavity and high respiratory way
- Your daily gesture for therapeutic and hygienic purpose
- Suction and irrigation in one unique patented device
- Compact and easy to use
- Suitable for adults and children
- Rechargeable battery

Device with irrigator cup

Device with aspirator cup

A DRUG FREE TREATMENT FOR CHRONIC AND ALLERGIC RHINITIS

Rhinitis is an inflammation of the mucous membrane of sinus cavities and can be acute (common cold) and chronic. Acute rhinitis is in most cases viral.

Chronic rhinitis is mostly secondary to other diseases of sinus cavities, such as sinusitis, curvature of nasal septum and enlarged adenoids. Allergic rhinitis, starts with a series of acute onsets and by the time it becomes chronic. It is triggered off by exposure to substances this person is allergic to (allergens) such as pollens, food (eggs, milk, beverages, etc), animal hair, dust mites, mold spores and substances in work and home environment.

Low energy phototherapy for

Running nose

Sneezing

Sinus congestion

Watery eyes

How does BD5500 work?

BD 5500 through the nasal tong, easy to use and to insert into your nostrils , emits a LED red narrow wave light and low energy to treat allergies of the nasal mucus membranes and congested nasal passages.

Suggested treatment of 5 minutes- 3 times a day for two weeks

BD5500 Alergós

- Wave Length: Narrow band 660nm
- 5 minutes treatment with beeping sound at each minute during operation
- Auto switch off after 5 minutes
- Blue LED timer indicator
- Battery: 2 x AAA Alkaline battery
- Battery life: Approximately 90 operations
- Low battery indication
- Dimension: 42.4 x 88 x 37.5 mm

*No pain
Non-thermal
No side effects
Healthy & safe
Suitable for kids*

bioSun

Light Therapy

BD7000

BioSun Light Therapy

The Bio Sun Light Therapy system is a worldwide patented light therapy medical device with a specific optical unit emitting light that is similar to the part of the electromagnetic spectrum produced naturally by the sun but with no UV radiation

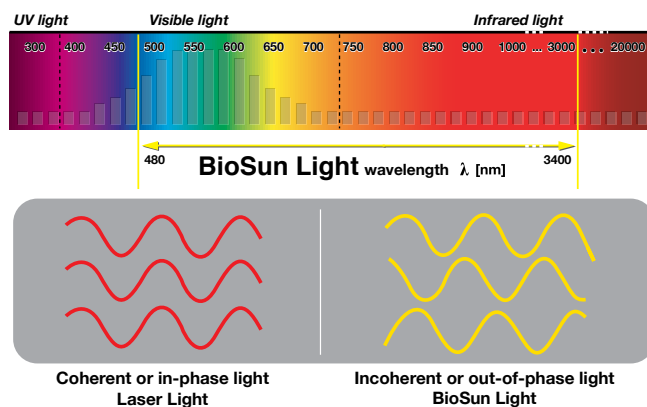

Light Characteristics

- **Polarized**
- **Polychromatic with no UV radiation**
- **Incoherent**
- **Low energy**

Indoor light – 500 LUX

Outdoor Light – 10000 LUX

Bio Sun Light – **10000 LUX**

PREVENTION

Stimulate Cells Activity
Stimulate Microcirculation

& ANTI-AGING

Increase Production of Vitamin D
Improve Skin Defensive System Reducing Premature Aging

*Friendly device for
everyday family
well being*

breast:scan™

EARLY DETECTION IS KEY IN DIAGNOSING BREAST CANCER

Breast Cancer can take your life, that's why we need to be more Breast aware.

Breast Cancer is the most common type of cancer in women after skin cancer.

One in nine women are diagnosed with breast cancer.

Breast Cancer is a disease that results from uncontrollable growth of cells in the breast tissue.

Knowing how to spot the differences in your breast and when to contact your doctor: can save your life.

Every women should know how healthy breast looks and feels like to become more aware of what to look out for and what is normal and healthy for her.

breast:scan™

Is Part Of Your Regular Breast Self Exam - (BSE)

Completely safe and easy to use

Increase your confidence in breast self
check's routine

Breast scan works with all skin tone and types of skin

It works very well with implants

Suitable for lumpy and larger breasts

No breast sizes restriction in using the device

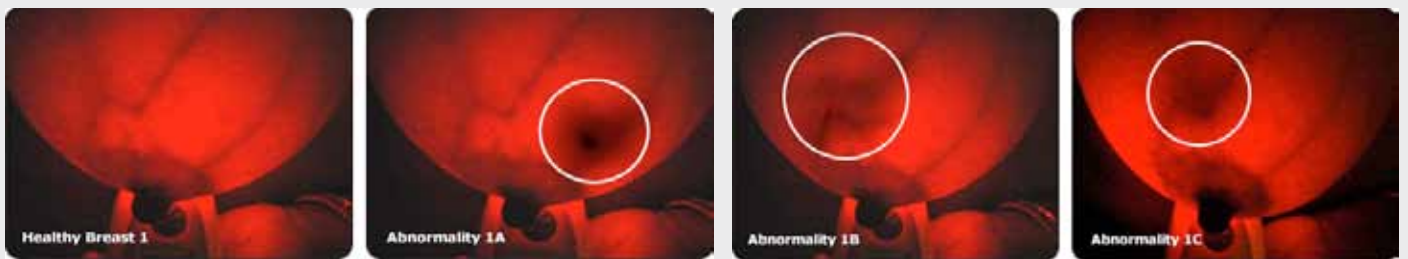

GET TO KNOW WHAT IS NORMAL FOR YOU...

If you know how your breast look and feel at different times you will easily recognize any changes

Potential abnormalities show as :

- Dark spots
- Masses
- Nipple's discharge
- Change in size and shape of your breast
- Shadows
- Lumps
- Breast's pain

Knowing your body is crucial in noticing early changes

PLEASE NOTE THESE PICS HAVE BEEN CREATED FOR ILLUSTRATIVE PURPOSE AND ARE NOT CLINICAL PHOTOGRAPHS

- BREAST SCAN IS NOT A SUBTITUTE FOR MAMMOGRAM SCREENING
- BREAST SCAN IS NOT A DIAGNOSTIC DEVICE

DID YOU KNOW THAT...

The density of breasts varies and this depends on a lot of factors :

- AGE
- SIZE
- HORMONAL CHANGES
- TIME OF THE MONTH
- It is recommended to use the breast scan one week after your period, when your breast are not swollen or tender
- For breast feeding mums it is recommended to suspend the use of the device until a few months after you have finished breast feeding , breasts too full of milk do not allow to see much

WELLNESS & PERSONAL CARE

A comprehensive range of high-class items are available at Bremed to provide our customers with selective choices for their health and well-being.

The quality of what we eat or drink, the quality of how we sleep, applications on weight management are essential conditions of our daily routine.

By using Bremed wellness and personal care items, you will experience the enhancement of comforts and enjoyment of well-being.

*Timeless • Innovative • Precise
Personal Scales With Style*

BD7700 Bathroom scale

- Equipped with a high precision strain gauge sensor system
- 4 sensors system
- 6 mm tempered safety glass platform
- Auto on
- Capacity: 150 kg/330 lbs
- Division: 0.1 kg / 0.2 lb
- LCD: 73 x 30 mm
- Auto zero resetting / Auto power off
- Kg/lb/st selection
- Low power / Over-load indicator
- Power: 1 x 3V CR2032 (included)

BD7780 Bathroom scale

- Equipped with a high precision strain gauge sensor system
- 4 sensors system
- Auto on
- Capacity: 200 kgs/440 lbs
- Division: 0.1 kg/0.2 lb
- Extra large LCD: 61 x 56.6 mm
- Auto zero resetting/power off
- Kg/lb/st selection
- Low power / Over-load indicator
- Power: 2 x AAA (included)

BD7730 Digital Body Composition Scale

- Equipped with a high precision strain gauge sensor system
- 4 sensors system
- 6mm tempered safety glass platform
- Auto on
- Capacity: 150 kgs/330 lbs / 23:6 st
- Division: 0.1 kg/0.2 lb
- Fat / water (hydration) graduation: 0.1%
- Muscle graduation (optional): 0.1%
- Memory: 10 persons
- Extra large LCD: 126 x 50 mm
- Auto zero resetting / Auto power off
- Kg/lb/st selection
- Low power / Over-load indicator
- Power: 2 AAA / R03 (included).

FLEXIBLE HEATING

Bremed has developed an essential and effective line of products for our daily "intensive heat therapy". Our electric heating pads not only have health benefits but pamper your body in cold winter.

Electric blanket performs a direct heat therapy and help health conditions indirectly. Applying heat to muscles increase the blood flow, enhances muscle nutrition and relaxation, which helps healing the pain and eases sleep. Back pain, tension or injuries can be relieved through the application of heat to affected area.

Heating Pad Therapy is most commonly used for rehabilitation purposes. The therapeutic effects of heat include increasing the extensibility of collagen tissues; decreasing joint stiffness; reducing pain; relieving muscle spasms; reducing inflammation and increasing blood flow. The increased blood flow to the affected area provides proteins, nutrients, and oxygen for better healing.

Safety is the most important issue when it comes to flexible heating products. We are well aware of this responsibility and therefore we use the well-tried and well-established Bremed Safety System in our underblankets and heating pads. The electric sensor technology prevents overheating in case of misuse by automatic switch-off, securing the highest possible safety. Safety and undisturbed sleep at a pleasant temperature.

BD7800 Electric Heating Pad

- 2 level temperature control
- Intelligent constant temperature control
- Removable and machine washable fleece cover
- Even heat distribution
- Overheat protection
- Input power: AC220-240V~ 50Hz
- Output power: 60W
- Dimension: approx. 32 x 40cm

BD7840

Electric Heating Overblanket

- Turbo-fast heating with 7 level temperature control
- Intelligent constant temperature control
- Illuminated heat setting display
- Detachable controller for easy cleaning of the blanket
- Machine washable
- Even heat distribution
- Overheat protection
- Auto switch off after 10 hours
- Input power: AC220-240V~ 50Hz
- Output power: 120W
- Material: Soft Fleece
- Dimension: approx. 130 x 180cm

Electric Heating Underblanket (Single)

- 2 level temperature control
- Intelligent constant temperature control
- Detachable controller for easy cleaning of the blanket
- Machine washable
- Even heat distribution
- Overheat protection
- Input power: AC220-240V / 50Hz
- Output power: 60W
- Material: Polar Fleece Polyester
- Dimension : approx. 80x150cm

WELL BEING - MASSAGERS

The **VACUUM MASSAGER BD7300** has been specially designed to improve the blood circulation and the lymphatic drainage. It helps to eliminate the toxin and the adipose tissue tropism, improving the general muscle tone.

BD7300 allows you to have a suction massage (vacuum) of professional quality in the comfort and privacy at home. This device performs an intense and effective massage that can be applied on most part of our body (neck, gluteus, breast, face, etc.).

Bremed vacuum massager carries out a deep massage (based on cutaneous suction) from the inside out, generating the mobilization of the fats present in the skin cells. The massage also activates the process of lipolysis, that leads to the reduction of solid fats. The massage causes increased blood flow; the blood supplies more oxygen and other nutrients, draining off the fluid present in the tissue.

You will experience the enjoyment of better health and younger look by using this unique device.

4 micro controlled suction
pace programs

Release button and
Pressure Volume Control

BD7300 Vacuum Massager with rechargeable battery

- To clean your skin
- To massage your skin
- To harden your breast
- To massage atrophied muscle
- To increase the circulation of lymphocyte
- To enhance the blood circulation and dissociate fat simultaneously
- Charging time: 5-6 hours
- Rated voltage: 110-120/220-240V
- Charger: DC4.2V, 800mA, 60Hz
- Suction: Super strong – 50Kpa

- Increase Lymphatic Circulation
- Reduce Solid Fats
- Purify Your Skin

*a unique device specifically designed
for the woman needs*

Improve Your Skin Tone

- Clean your skin
- Smooths neck and face wrinkles

XS Cup mm 10

• Facial

A great ally against cellulite!

- Improve blood flow
- Increase oxygen in the tissue
- Gradually remove excess of fluids
- Gain muscle tone on thighs, buttocks, abdomen, arms and legs

S Cup mm 30

• Neck and shoulders

*Especially Recommended To
Breast Feeding Mums!*

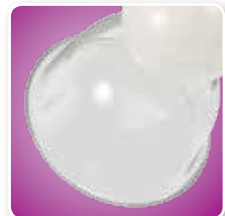

- Strengthens and enlarge breast
- Restore original breast tone after breastfeeding

M Cup mm 65

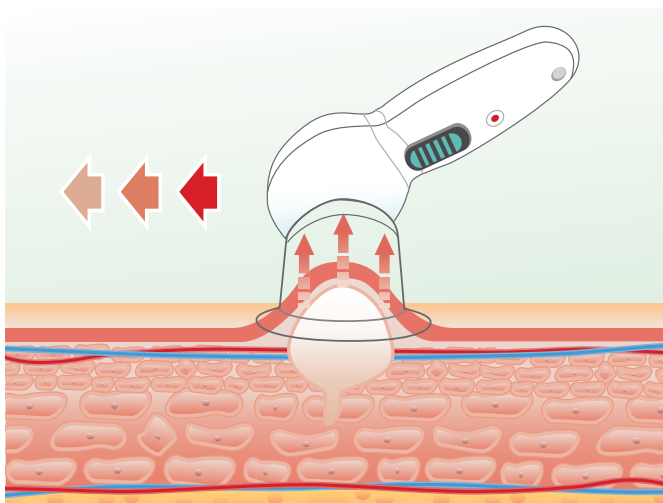

• Arms and Legs

• Abdomen and Hip

L Cup mm 95

• Breast

The principle of the vacuum massager is based on the acupuncture theory, for which our body is divided in "reflex zone" connected straight to the function of the internal organs.

The vacuum created on the cap stimulates the natural cutaneous receptors, while the massaging movement on the treated surface causes a powerful action on the muscles, and on the adipose tissues, improving therefore the blood circulation and the natural lymphatic drainage, with the final result to restore on healthier muscle tone.

BD7400 Infrared Body Massager

- Vibrating Massager
- Infrared provide deep heating effect
- Adjustable Head (Angled)

WELLNESS & PERSONAL CARE

TENS

Transcutaneous Electrical Nerve Stimulation

What is TENS?

The TENS unit is a small and portable device . It uses electric current produced by the device to stimulate the nerves for therapeutic purpose. It is one of the most commonly used forms of electroanalgesia.

TENS unit is programmable and the generators can deliver trains of stimuli with variable current strengths, pulse rates and pulse widths. Electrodes placed on the skin create an electrical current that decreases pain signals.

TENS increases body production of endorphins - a naturally released pain killer.

BD 7900 has been equipped with 9 preset programs applied for different kind of massage and available on two different and independent channels.

Which are the benefits ?

TENS provides initial pain relief to most of the users, especially against ;

- Neurogenic pain,
- Musculoskeletal pain
- Visceral pain and dysmenorrheal
- Knee osteoarthritis (improve knee stiffness)

Inhibit nerve pain resulting from :

- pinch nerves
- disc generation
- sciatica

BD7900 Tens

- 2 channels, 9 programs
- Adjustable intensity for different channels
- Easy to use, portable, lightweight
- Frequency: 2~80Hz, 135-240 μ s
- Power source: 2AAA Batteries
- Set of 2 Pairs Electrode pads and wire enclosed

BD7920

Set 1 Pair Electrode Pads

- Decrease pain perception
- Safe and effective pain relief to women during childbirth
- Non invasive
- Non addictive
- No side effects

POSTURE AND RELAX OUR ANATOMIC PILLOWS

Today's sedentary life is contributing to deteriorate the vertebral column that, continuously compressed by a prolonged seated position, at home, in the car, in the office, is excessively tending to curve. So the articular disks between the vertebrae are squeezed and therefore the first signs of arthrosis appear: neck pain, muscle stiffness etc.

On top of this the continuous use of the computer, for several hours a day, contributes to accelerate the insurgence of the cervical arthrosis disease.

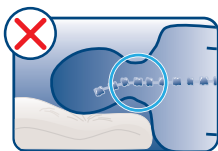

With the daily and simple prevention we can actively avoid such problems.

It is sufficient to balance the natural posture of the neck, sleeping on a pillow with a proper shape that will actively work while we are sleeping.

The Bremed anatomic pillows line has been scientifically studied by a team of expert Italian orthopedist in order to guarantee the correct posture of the neck during the resting time. The natural curve of the neck is supported by the shape of the pillow in order to avoid any pressure during the sleeping hours.

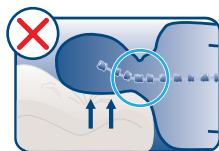

HOW TO CHOOSE A PILLOW ?

Using pillow of improper density and filling, whether it is too hard, too soft or with high elasticity, will not only lower your sleeping quality but also cause damage to your cervical vertebra in a long run.

Soft pillow

Insufficient support of pillow affects the natural spinal alignment and causing soreness

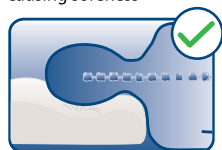

Hard pillow

Pressure cannot be relieved, causing discomfort

Highly-elastic pillow

Rebound pressure is increased, results in bad blood circulation and stressing of neck nerves

If one sleep on his/her side, then the pillow should be high enough to keep the neck and the rest of the spine in a straight

If one sleeps on his/her back, then the pillow should be just high enough to maintain the neck's

BD6600

Anatomic anti-cervical foam pillow

- Using selected 50D high-density memory foam
- Molds to the contour of your head and neck
- Temperature sensitive foam responds to body heat and weight
- Offer great flexibility with two different support levels
- Removable and washable velour cover
- Long lasting comfort and support
- Size: 30 x 50cm

*Molds To The Contour Of Your Head And Neck
Two Support Levels*

*Molds to the contour of waist and hips
Home, office, car use*

NATURAL

TUSCANY ITALY

Handcrafted in Italy

Spelt Husk

Spelt is an ancient cereal, mainly grows in Tuscany today. It has always known for its exceptional natural properties, which makes our products very special and unique. The husk is the outer case that covers and protects the single spelt grain. Spelt husk is hypoallergenic and a natural dust mite repellent. The texture is light, springy and contains a lot of air, which makes it a natural Thermo and moisture regulator, perfectly keeping dry and cool in summer and retaining heat in winter. Its firmness and flexibility works in perfect harmony with our body movements and provides the right support, comfort and relaxation. Obebe Natural products are filled with spelt husk supplied only by organically certified cultivators in Italy. Our spelt husk is cleaned and cryogenically treated (a deep frozen process), covered with raw cotton fabric. Each product comes with a washable bio cotton cover in non-toxic and chemical-free coloring. Our amazing range of accessories using this unique natural material is dedicated to improve your quality of life and the health of your baby.

Spelt Husk Properties

Natural dust mite repellent;
Thermo-regulator: keeping dry and cool in summer and retaining heat in winter
Proven stress relieving and calming effect, used to improve circulation. Ergonomic, firm and comfortable
